

Research Breakout

Potential for Live Transcription of Zoom

- With IRC chat being eliminated an important source of data is also going away. Zoom live transcription is a possibility we will look into.

Research at ECU

Over the past few years, ECU has had a robust research agenda. Main findings:

- VE increases likelihood of subsequent study abroad.
- VE has a powerful impact on Cultural Intelligence.
- VE has a small but significant impact on GPA.
- VE has a larger impact on black students here at ECU.

Research Repository / Participation

- If transcripts do work, we would like to build a repository so anyone can contribute or use the data.
- We individual groups willing to contribute would have to have students sign local releases to address privacy issues.
- We will send out a call to see who is interested in participating as both suppliers of data users of the data collected by our membership network.
